petex®
Der starke Autoausstatter

The leading car accessories supplier from Eggenfelden in Lower Bavaria.

The family-owned company PETEX is synonymous with precision craftsmanship and products of the highest quality. Established in 1981, this family business serves commercial customers worldwide. More than 100 importers from 35 countries rely on PETEX quality from Bavaria.

ZERTIFIKAT

Zertifikat-Registrier-Nr.: 12 100 11364 TMS / Auftrags-Nr.: 70021207

Die Zertifizierungsstelle
der TÜV SÜD Management Service GmbH
bescheinigt, dass die Organisation

petex

PETEX Autoausstattungs-GmbH
Lauterbachstraße 44
84307 Eggenfelden
Deutschland

für den Geltungsbereich

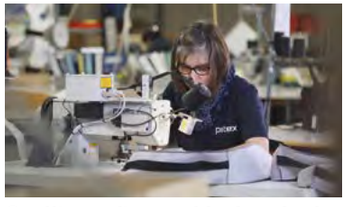

Entwicklung, Beschaffung, Herstellung und Vertrieb von Autoteppichen, Autositzbezügen, Gummimatten, Fellbezügen und Zubehör

ein Qualitätsmanagementsystem eingeführt hat und anwendet.
Durch ein Audit wurde der Nachweis erbracht, dass die Forderungen der

DIN EN ISO 9001:2015

erfüllt sind.

Dieses Zertifikat ist gültig vom 14.10.2023 bis 13.10.2026.

Quality craftsmanship for six decades.

For 45 years, Petex has been a reliable supplier of high-quality automotive accessories. In addition to our premium line of seat covers, we also manufacture all rubber mats, custom-fit car rugs, and universal car rugs at our own facilities.

Other areas of focus: car accessories and child seats.

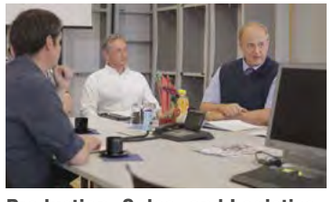

The product line includes safety items, wheel covers, car care products, workshop supplies, professional load-securing equipment, child seats, ice scrapers, snow brushes, and much more.

Our employees are our most valuable asset.

When it comes to the high-quality craftsmanship of our products, nothing can replace the experience and qualifications of our employees.

A reliable business partner.

PETEX is constantly expanding its range of services to meet the needs of the market and our customers. PETEX Auto-Ausstattungs-GmbH has long-standing partnerships with many satisfied customers.

Production, Sales, and Logistics.

Customers value the company's experience in the areas of production, sales, and logistics.

Eggenfelden Mitterhof Distribution Center.

This new logistics facility has a pallet capacity of 14,000 storage spaces. The entire product range is stored at this location. This enables Petex to deliver even the largest quantities in the shortest possible time. Leading discount retailers have relied on Petex's quality products for years. The new Petex Outlet is also located here.

PETEX is known for its carefully manufactured products and is certified to ISO 9001:2015.

We ensure that all products - whether manufactured in-house or purchased from suppliers - meet our high quality standards. Our ISO 9001:2015-certified quality management system ensures consistently high-quality manufacturing and monitoring processes at every stage of production.

The Raw Materials Warehouse - Eggenfelden Location.

All materials required for production - such as carpet rolls, fabrics, edging tapes, and fastening systems - are stored here. The pallet storage capacity comprises approximately 3,000 storage spaces. This high storage capacity makes it possible to reliably fulfill even large orders with tight delivery deadlines.

DESIGN VARIATIONS

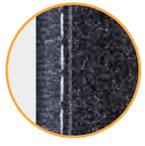

Are you looking for a custom-fit car mat?
No problem!

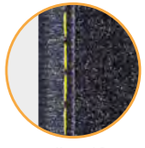

In addition to the standard edging, we also offer other types of edging (see the options shown).
This is available for all custom-fit car mats for a small additional charge.

Edging process for doormats-handcrafted, of course, to ensure the highest quality.

For entry-level products and upon customer request, the mats are finished with a hem. For higher-quality carpets, various velour, woven, and nubuck edging tapes are used. You can see a selection of different options on pages 6 and 7.

The mounting systems are installed before the mats are shipped. They largely correspond to the original systems installed in the vehicles. The openings are precisely cut into the floor mats during the cutting process.

CUSTOMIZED PRODUCTS.

There are no limits to your creativity. Bring your ideas to life with the support of the specialists at PETEX. Learn more about our services. Attractive, fast, and reliable. Precision craftsmanship in Eggenfelden. Prototype production in Germany. Let the following ideas inspire you.

SUITABLE FOR ALL AGRICULTURAL MACHINERY ...

Unlimited creativity on the road or in the field - we can create the perfect solution for any vehicle.

Custom example based on customer specifications
for SDF - Same Deutz-Fahr.

Custom tractor rug
For krone forage harvesters with custom embroidery designs.

... OR FOR GOVERNMENT VEHICLES.

Special-purpose vehicles can also be customized with special, custom-made features.

Custom-made interior fittings for emergency vehicles.
Be prepared for any extreme situation and expand your gear.
We offer a wide range of high-quality materials and many options to help you do just that.

Custom-made storage bag for tools.
Protects the internal components with optimal cushioning. Reduces noise and shock.

Cover for the protective bar.
Extra gentle.

CUSTOMIZED MUD GUARDS FOR YOUR VEHICLE.

Custom-made rubber mud flaps.
For any fit with fasteners. Very easy to care for and extremely durable.

EVEN A TWO-WHEELER HIDES IDEAS...

A rubber mat for the cargo bike's cargo box.
Anything is possible. The mat provides optimal protection against damage during transport.

petex®
Der starke Autoausstatter

All PETEX rubber mats bear the ITC “Tested for harmful substances” label. This means that the material we use has been tested for:

- **Selected REACH SVHC Substances**
- **Phthalates - Plasticizers**
- **Polycyclic Aromatic Hydrocarbons (PAHs)**
- **Formaldehyde emissions**

In addition to a quality management system certified by TÜV Rheinland in accordance with EN ISO 9001:2015, our rubber mat production facility in the Czech Republic also operates an environmental management system in accordance with ISO 14001:2016. From the procurement of raw materials to the delivery of the finished product - everything meets our highest quality standards.

Includes cutouts for mounting hooks

ANTI-SLIP REGUPOL® 7210 LS PLUS

- The key technical characteristics of Regupol anti-slip mats significantly exceed the minimum requirements specified in VDI 2700, Part 15. These requirements are:
- Elongation at break: at least 60%
- Tensile strength: at least σM 0.60 N/mm²
- Kinematic coefficient of friction approx. μD 0.60, depending on the material pairing
- Reduces cargo slippage
- Protects the cargo area from damage
- Temperature-resistant: -40° C to +120° C
- Material: PUR-bonded rubber granules
- Maximum load: 250 t/m² = 2.50 N/mm² at a thickness of 8 mm
- UV-resistant
- Sodium chloride-resistant
- Resistant to weak acids and alkalis

According to BSW GmbH, Regupol® anti-slip mats have been tested by:

TÜV NORD · DB Deutsche Bahn AG · Fraunhofer IML Institut Materialfluss und Logistik · DEKRA

TRUNK MATS - Fit

The tray mats are made of a modern, odorless TPE that is exceptionally flexible and dimensionally stable. TPE is known for its high durability. The tray mats are resistant to water, oil, dirt, UV light, and all weather conditions.

The shell mats are hypoallergenic and free of toxic substances. They are therefore safe and do not emit any fumes. The non-slip surface ensures reliable load securing and provides a quiet, safe driving experience.

Model table under

TRUNK MATS FIT

- Custom-made in 3D
- Especially durable
- Made of slip-resistant material
- Easy Installation
- Water- and oil-resistant, PVC-free
- Extra-high rim (4.5 cm)
- Temperature resistance from -50 °C to +50 °C

Close-up

Close-up

Protect your vehicle all year round!

Protects against dirt, stains, and damage - the extra-high edges provide double protection for your car.

Cleaning with a pressure washer is easy. Thanks to their temperature resistance ranging from -50°C to +50°C, the tray mats are ideal for use in all four seasons.

GROOVED RUBBER ROLL GOODS

- High-quality rubber
- Roll length: approx. 10 m
- Hardness (ShA): 80 ±5%
- Weight: approx. 4.2 kg/m²

GARAGE BUMPER

- Parking assistance for garages, parking spaces, and carports
- The rubber stopper ensures a safe distance
- To prevent damage while parking
- Easy installation – no screws required
- Optional anchoring to the floor with screws is possible
- Made from a rubber compound that is gentle on tires
- With reflective strips in accordance with ECE R 104
- Particularly sturdy design
- Weather-resistant

CAR DOOR WALL PROTECTION

- Prevents the car door from hitting the garage wall. Simply stick it in the appropriate spot, and the car door will be permanently and effectively protected.
- Set of 2 wall protection panels
- Size: approx. 56 x 15 cm
- With a strong adhesive coating on the back
- Attractive two-color design

The wide selection of PETEX seat covers offers the right quality for every need and application.

petex first class

- Top-quality items in our product line
- **Made in Germany**
- **From our own production**

- For cars / trucks / vans / station wagons
- Greater safety thanks to a Pre-Tear seam*

petex business class

- Semi-fitted
- **Made in Germany**
- **From our own production**
- High-quality fabrics
- For cars / trucks / vans / station wagons
- Greater safety thanks to a Pre-Tear seam*

petex eco class

- Universal fit
- For cars / trucks / vans / station wagons
- Greater safety thanks to a Pre-Tear seam*

* Some first-class seat covers are also manufactured with a cutout instead of a tear-away seam. Covers with a tear-away seam can also be easily installed in vehicles without side airbags.

petex Der starke Autoausstatter

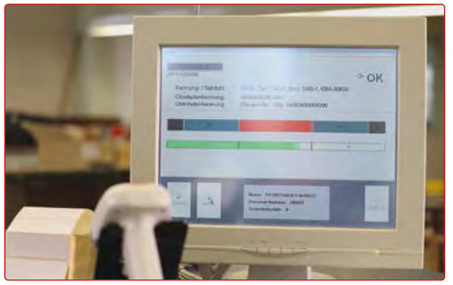

Greater safety thanks to the tested predetermined tear seam.

PETEX seat covers are equipped with predetermined tear lines.

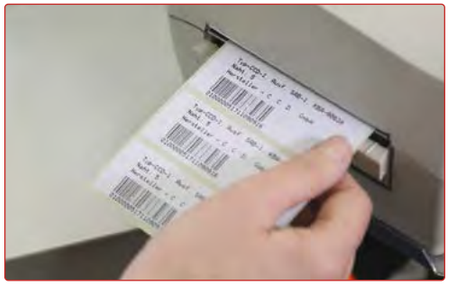

Many of the PETEX seat covers for vehicles equipped with side airbags feature a predetermined tear seam tested by TÜV Rheinland. In the event of an accident, this ensures that the side airbag can deploy unimpeded. Every vehicle model listed in our KBA type approval table has been individually tested by TÜV Rheinland for this feature and approved by the Federal Motor Transport Authority (KBA).

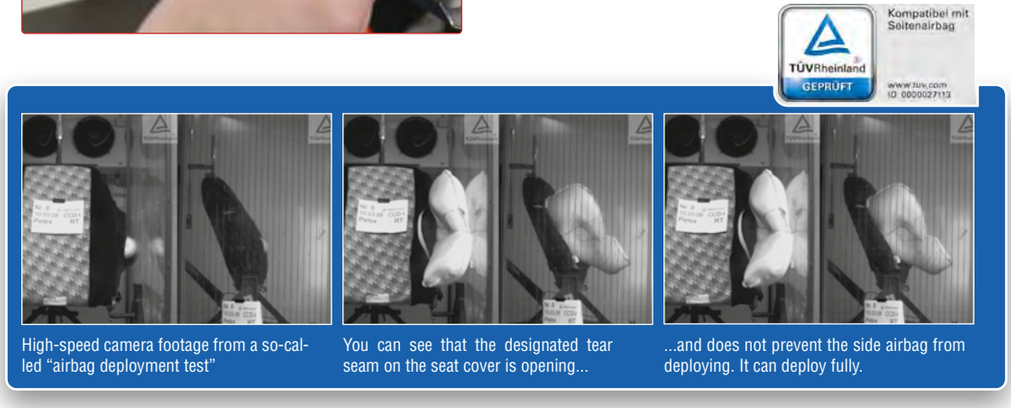

Please note that you can find all seat covers approved for your vehicle in the respective model tables at **www.petex.de.**

Tested safety.

The TUVdotCOM ID serves as a key to all certificates issued by the TÜV Rheinland Group. This ten-digit number provides access to information available online regarding the verified characteristics of a product, service, or company. Please enter the ID in the designated field on the TÜV website at www.tuv.com. You will then be immediately redirected to an overview of the test results.

High-speed camera footage from a so-called “airbag deployment test”

You can see that the designated tear seam on the seat cover is opening...

...and does not prevent the side airbag from deploying. It can deploy fully.

* Our seat covers are tested by TÜV for their performance in accident situations.

petex Der starke Autoausstatter

EXPLANATION OF SYMBOLS

The TÜV Rheinland Group is an internationally active, independent testing service provider and operates as a technical inspection organization in the areas of safety, efficiency, and quality. Our seat covers are TÜV-certified and specifically designed to be compatible with side airbags. The TUVdotCOM ID serves as the key to all certificates issued by the TÜV Rheinland Group. This ten-digit number provides access to information available online regarding the tested characteristics of a product, service, or company. Please enter the ID (0000027113) into a data field on the TÜV website at www.tuv.com to be redirected to an overview of the test results.

At regular intervals, we have the TÜV Rheinland Group conduct tests on new vehicle models to ensure that the vehicle's side airbag is compatible with the seat covers and that it deploys properly. If this is the case, the relevant vehicle models are included in the type approval issued by the Federal Motor Transport Authority (Kraftfahrt-Bundesamt). This means you can be confident that the side airbag will not be obstructed in any of the tested models.

We are pleased to present our Wellness Multitex fabrics, which have been tested by the renowned Hohenstein Institutes. "Air-Stream" provides optimal breathability and ventilation. At the same time, it ensures faster moisture transfer and rapid air drying, prevents heat buildup, and regulates the balance between heat generation and heat loss. The integrated wellness feature enhances seating comfort and promotes concentration while driving.

This product has been tested and successfully certified in accordance with the strict criteria of the Oeko-Tex Standard 100. The testing process ensures that the products meet the required health standards. The criteria and limits for harmful substances set forth in the internationally uniform Oeko-Tex Standards are subject to regular revisions and updates.

Safefront provides protection against mites, bacteria, and fungi that can cause allergies. Safefront is free of insecticides and other volatile substances. This measure ensures optimal hygienic protection for the upholstery fabrics and thus helps you stay in the best possible health.

The symbols in the illustration have the following meanings: The seat cover is also suitable for vehicles with side airbags. Gentle cycle (30°C). Washable up to 30°C. Do not wash. Foam lining is flame-retardant. Lightfastness tested. Abrasion resistance tested.

First CLASS

PETEX “First Class” seat covers

These products are characterized by carefully selected materials - the same ones used in the automotive industry - as well as their precise fit. Thanks to the expertise we’ve gained over 45 years in manufacturing high-quality, precisely fitting seat covers, we’re able to offer you a product that will impress you in terms of quality, materials, and fit. PETEX’s high-quality “First Class” seat covers are designed to accommodate all cutouts for controls and map pockets.

For cars, vans, and trucks

Our seat covers are suitable for a wide variety of vehicle types, including passenger cars, vans, and trucks. We also offer a custom fit for older model years. Manufacturing at our German facility allows us to respond quickly and flexibly to customer requests.

PETEX Custom seat cover

We are confident that you will be satisfied with your new custom-fit PETEX seat cover. Even after the warranty period has expired, individual parts of these seat covers can be replaced at a reasonable cost as needed.

* Some first-class seat covers are also manufactured with a cutout instead of a tear-away seam. Covers with a tear-away seam can also be easily installed in vehicles without side airbags.

Digitization of templates for custom car seat covers.

Petex seat covers are the result of many individual steps in the craftsmanship process. The drawn parts are digitized and optimized to create precisely fitting cutting templates. This process allows car seat covers to be manufactured with a high degree of precision. The “Hand Made in Germany” seal guarantees the highest quality craftsmanship.

- Middle section: 100% polyester
- Side panels / back / trim: solid-color jersey, 100% polyester
- Fabrics are additionally laminated with tricot to protect the original upholstery
- Elegant design with striking metallic contrast yarn

Thanks to the construction of the center section, this cover offers high durability while providing optimal climate control.

The fabric construction reduces the body's contact surface with the seat, thereby also minimizing potential heat buildup. This automatically creates air circulation when moving on the seat.

The three-dimensional fabric structure (approx. 3.5 mm) does not require additional lamination of the fabric. This ensures excellent moisture wicking and breathability. The high-quality yarns used further support these processes.

- Back / edging: 100% polyester, knitted
- Fabrics are laminated with tricot to protect the original upholstery
- Abrasion resistance tested according to the Martindale method > 100,000
- Tensile strength > 20 N (BS 4303) 3 daN (DIN 53859-5)
- Enhanced with safefront
- Certified according to STANDARD 100 by OEKO-TEX No. S02-0339 HOHENSTEIN HTTI

Care Instructions

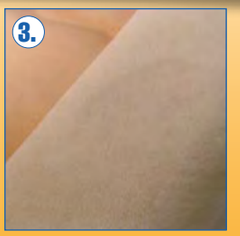

Thanks to the fabric's special properties, even the toughest stains can be removed in just 3 steps:

1. Moisten a tissue with water
2. Rub the stain with circular motions
3. If you remove the tissue, the stain is gone, too

To extend the fabric's lifespan, it should not be machine-washed.

High-quality semi-custom car seat covers. Made in Germany.

You can find vehicle models approved by the KBA in the model table at **www.petex.net**, or simply scan the QR code on the right.

- Semi-fitted
- Made in Germany
- From our own production
- High-quality fabrics
- For cars / trucks / vans / station wagons
- Greater safety thanks to a Pre-Tear seam*

Business CLASS

"Business Class" seat covers

are also characterized by select, high-quality fabrics. These seat covers are also manufactured exclusively in Germany. The fit corresponds to that of our "Economy Class" covers. Please note, however, that - as with the "First Class" line - you can also purchase covers for vans, station wagons, and trucks. Our seat covers for vehicles with side airbags are certified in accordance with TÜV Rheinland testing standards and feature a predetermined tear seam that does not impair the function of the side airbag in the event of an accident.

For cars, vans, and trucks

"Business Class" seat covers are available in versions for passenger cars, vans, and trucks. Manufacturing at our German facility allows us to respond quickly and flexibly to customer requests.

Front seat SAB 1:

This cover consists of two separate pieces for the seat and the backrest.

Front seat SAB 2:

This cover is made from a single piece of fabric that is used for both the seat and the backrest.

Rear seat cover „Vario"

The "Vario" rear seats are each equipped with two zippers along the backrest. The seat cover can be divided as needed to fit the specific shape of the vehicle's rear seat bench.

Rear seat cover „Vario Plus" (See the image)

The "Vario Plus" rear seats are equipped with three zippers on the backrest and seat cushion of the rear bench. There is also the option to remove a center section of the cover (1) to improve its fit. Side cover panels are also included in the package. This allows you to cover the exposed side panels that become visible when the rear seat is folded down (2).

Model table

* Covers with a pre-cut seam can also be easily installed in vehicles without side airbags.

PETEX semi-custom seat covers in a wide variety of colors and designs for cars, vans, and trucks.

SEAT COVERS - Eco Class

- Universal Fit
- For cars / trucks / vans / station wagons
- Greater safety thanks to a Pre-Tear seam*

ECO CLASS

Our “Eco Class” seat covers are available in various designs, depending on the model. The complete set and the front seat set are available. Our “Eco Class” seat covers are available in various designs and give your vehicle a unique look.
The PETEX 2026 collection was also designed to meet a wide range of preferences and requirements. The product stands out for its versatile applications.

In addition to offering affordable prices, we also prioritize the highest level of safety in our “Eco Class” line. For this reason, all seat covers in this product line are equipped with tear-away seams for side airbags. In the event of an accident, the side airbag is guaranteed to deploy unimpeded. In accordance with TÜV Rheinland specifications, every vehicle model listed in our KBA type approval table was individually tested for this feature and ultimately approved by the Federal Motor Transport Authority (KBA).

Seat covers for Eco and Business Class are available in the following variations:
SAB 1 (= 2-piece front seats) and SAB 2 (= 1-piece front seats)

For cars, vans, and trucks
“Eco Class” seat covers are available in designs for passenger cars, vans, and trucks. Manufacturing at our German facility allows us to respond quickly and flexibly to customer requests.

Front seat SAB 1:
This cover consists of two separate pieces for the seat and the backrest.

Front seat SAB 2:
This cover is made from a single piece of fabric that is used for both the seat and the backrest.

Rear seat cover „Vario“
The “Vario” rear seats are each equipped with two zippers along the backrest. The seat cover can be divided as needed to fit the specific shape of the vehicle’s rear seat bench.

Rear seat cover „Vario Plus“ (See the image)
The “Vario Plus” rear seats are equipped with three zippers on the backrest and seat cushion of the rear bench. There is also the option to remove a center section of the cover (1) to improve its fit. Side cover panels are also included in the package. This allows you to cover the exposed side panels that become visible when the rear seat is folded down (2).

Model table

* Covers with a pre-cut seam can also be easily installed in vehicles without side airbags.

The right choice for your most valuable passenger

because safety comes first!

What should you keep in mind when traveling with your child?

- Which car seat is right for which child?
- What should you look for when making a purchase?
- What mistakes should you avoid to ensure your children's safety?
- What factors should be considered when selecting and using child seats and infant baby carrier seats?

With 45 years of experience, we can answer all your questions.

Safety first!

Child seat, LLC

Child seat model

i-Size Universal ISOFIX
40 cm – 105 cm / <18 kg

E4

030815

UN Regulation No. 129/03

Seat manufacturer and seat model

Approved uses, e.g., i-Size, universal, or specific vehicle ISOFIX, or belted

Approved for the size range (and maximum weight, if applicable)

Registration code for the country of registration: E1 (approval granted in Germany), E2 (France), E3 (Italy), E4 (Netherlands)...

Approval Number

European child safety seat testing standard, in this case the 3rd series of amendments to UN Regulation 129

EXPLANATION OF SYMBOLS

Child safety systems in Europe must meet the essential safety requirements and are therefore subject to approval. Only child seats that meet the strict legal requirements are awarded the ECE mark.

All of our child restraint systems have been tested and approved and meet the requirements of the latest ECE Regulation No. ECE R129.

The child safety seat requirement!

In Germany, the child safety seat requirement has applied since 1993, pursuant to Section 21(1a) of the Road Traffic Regulations (StVO), to children who have not yet reached the age of 12 or are shorter than 150 cm. Regardless of their height, children up to 15 months of age may not be transported facing forward in these child safety seats. The table on the right provides information on child safety seat requirements in the respective EU countries based on the child's age and height.

Country	Size	Age
Germany	<150 cm	12
Belgium	<135 cm	-
Denmark	<135 cm	-
Spain	<135 cm	12
Netherlands	<135 cm	18
Czech Republic	<150 cm	-
Switzerland	<150 cm	12
Poland	<150 cm	12
Austria	<150 cm	14
France	-	10

ISOFIX MOUNTING SYSTEM.

Child seats with **ISOFIX support** or **ISOFIX connect** can be used with the modern ISOFIX systems provided by automakers. ISOFIX is an easy-to-use installation system that is increasingly becoming the standard in the automotive industry.

Experts recommend securing the child seat with ISOFIX, as its ease of use significantly reduces the risk of incorrect installation.

ISOFIX connect

ISOFIX CONNECT.

ISOFIX connect - These products can also be used in cars with the standardized ISOFIX systems.
However, they do not have a top tether attachment and must be secured using the car's existing 3-point seat belt as a third anchor point.

ISOFIX support

ISOFIX SUPPORT.

In addition to the mounting brackets, products with the **ISOFIX support** label feature an integrated top tether attachment. The top tether prevents unwanted rotation of the seat around the mounting brackets. It also serves as a third attachment point. The child seat does not need to be secured additionally with the 3-point seat belt.

KINDERSITZ-PLATZIERUNG UND -AUSRICHTUNG.

1. Forward-facing installation: The child faces forward.

2. Rear-facing installation: The child is facing backward.

3. Do not use in a front passenger seat with an active front airbag.

ECE R129 (i-Size) Standard

Child seats compliant with ECE 44/04 could still be sold through September 2024. As of today, these products may also continue to be used. However, the new ECE R129 standard for so-called "i-Size" child seats has been in effect since 2013.

The main differences in the current standard are as follows:

- the approval of seats based on height rather than weight
- the requirement to use a rear-facing baby carrier seat for up to 15 months
- the newer, higher safety standards, i.e., side-impact protection tests using "Q-dummies," which more realistically simulate the effects of a crash on the bodies of real children and are equipped with sensors in the head, neck, and abdomen areas.

BABY CARRIER SEAT

Always safe on the road.
From birth!

Comfortable and practical.

According to ECE R 129, rear-facing travel is required until the child is 15 months old. Our infant baby carrier seat is suitable for children between 40 cm and 87 cm in height and complies with the new ECE R 129 standard. Its lightweight yet sturdy construction makes it easy to handle and carry. The padding and the 5-point harness ensure safety and comfort. The practical carrying handle, the adjustable sun canopy, and the rocking function round out its features. The “Bambini” infant baby carrier seat can be secured in the vehicle using a 3-point seat belt. However, if your vehicle is equipped with “Isofix” anchor points, the infant baby carrier seat can be secured even more quickly and securely using the separately available Isofix base. If the vehicle has a front passenger-side airbag that cannot be deactivated, it is recommended for safety reasons to install the seat only in the back seat.

MATERIAL

All products in the Junior line are made from high-quality, carefully selected materials.

Carrier seat: Impact-resistant HDPE plastic
Seat cover: Breathable knit fabric, flame-retardant, 100% polyester
Upholstery: Foam, flame-retardant, shock-absorbing

BAMBINI - Baby carrier seat

- Complies with the EU standard ECE R129
- Lightweight yet sturdy construction perfect for carrying your child

CHILDREN'S SEAT

We've combined protection and comfort...

Proven quality at an affordable price.

If your child has outgrown the infant baby carrier seat, a child's car seat should be the next step. Depending on the model, our child seats are suitable for children ranging from 40 cm to 150 cm in height and boast an impressive range of features. High-quality materials and modern restraint systems such as ISOFIX or i-Size, combined with a 5-point harness, make every car ride a safe and relaxing experience for both parents and children.

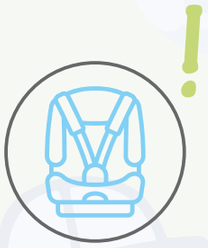

MATERIAL

All products in the Junior line are made from high-quality, carefully selected materials.

Carrier seat: Impact-resistant HDPE plastic
Car seat: Breathable knit fabric, flame-retardant, 100% polyester
Upholstery: Foam, flame-retardant, shock-absorbing

CHILDREN'S BOOSTER SEAT

Get ready for the next level!

Maximum protection and comfort combined with the highest quality.

We offer a comprehensive selection of child booster seats. They fit any standard car seat and are suitable for children between 125 and 150 cm in height (DE).

The "Max" restraint system can be installed quickly and easily using the three-point seat belt. Our "Max PLUS" also features ISOFIX-Connect mounting rails. These provide even greater safety, as they ensure that the booster seat is securely connected to the vehicle's ISOFIX anchor points. Our booster seats are available in many colors and designs.

MATERIAL

All products in the Junior line are made from high-quality, carefully selected materials.

Carrier seat: Impact-resistant HDPE plastic

Seat cover: Breathable knit fabric, flame-retardant, 100% polyester

Upholstery: Foam, flame-retardant, shock-absorbing

MAX - Children‘s booster seat

- In accordance with the current ECE R129 standard

ACCESSORIES

Travel in comfort—with style and convenience, no matter where your journey takes you...

Practical accessories perfectly round out our product line, serving as the ideal complement to our child seats and booster seats.

BACK SEAT ORGANIZER

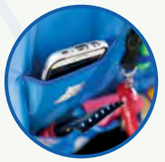

- Easy attachment to the backrest
- Practical bags for cell phones, books, and more

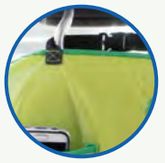

Design pink | Design blue | Design green

Convenient carrying loops.

A wide variety of pockets and storage options.

It's a breeze to attach it to the headrest of the front seat.

LOAD SECURING

HOOK AND WOVEN LASHINGS

Double-pointed hook (DJH) | **hook material:** steel, galvanized | **tension force:** 1000 / 2000 daN | **webbing material:** polyester (PES) | **elongation:** ≤ 7 %

Double-pointed hook (DJH) | **hook material:** steel, galvanized | **tension force:** 2000 / 4000 daN | **webbing material:** polyester (PES) | **elongation:** ≤ 4 %

Double-pointed hook (DJH) | **hook material:** steel, galvanized | **tension force:** 2500 / 5000 daN | **webbing material:** polyester (PES) | **elongation:** ≤ 4 %

Snap hook (SH) | **hook material:** steel, galvanized | **tension force:** 2500 / 5000 daN | **webbing material:** polyester (PES) | **elongation:** ≤ 4 %

Lashing belt, single: (SLB) | **hook material:** steel, galvanized | **tension force:** 1000 / 2000 daN | **webbing material:** polyester (PES) | **elongation:** ≤ 5 %

Lashing belt, single redatable: (SLBR) | **hook material:** steel, galvanized | **tension force:** 1000 / 2000 daN | **webbing material:** polyester (PES) | **elongation:** ≤ 4 %

Safety-double-pointed hook (SDJH) | **hook material:** steel, galvanized | **tension force:** 1000 / 2000 daN | **webbing material:** polyester (PES) | **elongation:** ≤ 4 %

RATCHET TYPES

Short-lever ratchet | **tension force:** 1000 / 2000 daN | **manual labor:** SHF 50 daN / STF 300 daN

Standard ratchet | **tension force:** 2500 / 5000 daN | **manual labor:** SHF 50 daN / STF 400 daN

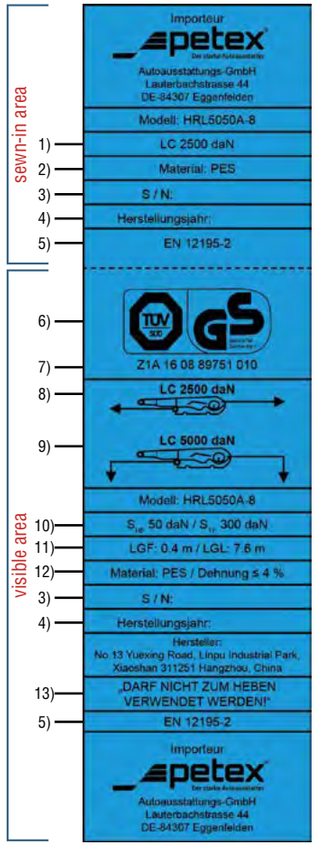

ERGO-ratchet | **tension force:** 2500 / 5000 daN | **manual labor:** SHF 50 daN / STF 500 daN
Length of the ratchet: approx. 35 cm

SEWN-IN LABEL ACCORDING TO DIN EN 12195-2

When selecting ratchet lashing straps, be sure to check the sewn-in label. It contains a lot of important information. Every lashing strap must be equipped with an appropriate label in accordance with DIN EN 12195-2.

1) LC (Lashing Capacity) = Maximum allowable force in a straight pull
2) Webbing Material = The material used can be identified by the label's description and/or color:
   - 2a) PES (polyester), blue label, suitable for a temperature range of -40 °C to + 120 °C
   - 2b) PA (polyamide), green label, suitable for a temperature range of -40 °C to + 100 °C
   - 2c) PP (polypropylen), brown label, suitable for a temperature range of -40 °C to + 80 °C
3) Serial number = Manufacturer's traceability code
4) Year of manufacture
5) Standard number = The standard according to which the lashing strap was manufactured
6) Certification mark = These lashing straps are TÜV-GS certified
7) Certificate number = Test certificate number
8) LC straight line
9) LC strapped line
10) S_{HF} (Standard hand force - normal hand force) = Specified force applied to the ratchet handle that generates the tensile force in the lashing strap STF (Standard Tension Force) = Remaining tension force after the ratchet handle has been released
11) LGF = Length of the fixed end / LGL = Length of the free end
12) Maximum elongation of the webbing: According to DIN EN 12195-2, the webbing must not elongate by more than 7% when subjected to the maximum permissible force LC. The lashing straps in our Profi-Line have an elongation of ≤ 4–7%.
13) **Warning:** Lashing straps must not be used for lifting; they are intended solely for securing cargo.

The labels on the ratchet straps, which comply with DIN EN 12195-2, are fully sewn on. This ensures greater predection against tearing and wear!

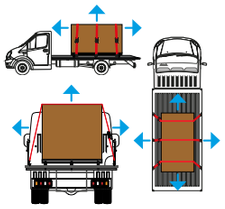

According to the law, vehicle bodies must be designed so that, when the vehicle is used as intended, the load is or can be secured against slipping, rolling, tipping over, falling, and - in the case of tanker trucks - leaking. If the vehicle body alone does not ensure that the load is secured, auxiliary load-securing devices must be available. Flatbed bodies and low-loaders must be equipped with anchor points for lashing devices used to secure the load.

… TÜV-certified!

Our Profi-Line products have been tested by TÜV for quality and suitability and have been awarded the GS safety certificate.

Intended use of the lashing device:

Lashing straps are needed to "secure" the load to the cargo area. With oblique or diagonal lashing, the load is secured directly to the vehicle. In this case, the lashing equipment must absorb the forces generated during acceleration, braking, and when cornering. Improper load securing poses a danger to the lives of people, animals, or goods! Follow the general guidelines, especially the hazard warnings from the DIN standard EN 12195-2.

Barrel stripes and color code

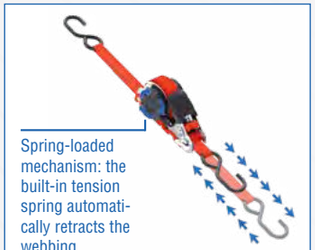

Stitched-in load-capacity stripes indicate the maximum load that lashing straps can withstand. For example, 5 stitched-in load-capacity stripes indicate a maximum load of 5,000 kg.

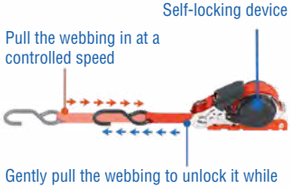

AUTOMATIC-RATCHET-TIE-DOWN

- Convenient automatic rewind feature - no more tedious rewinding
- With built-in webbing brake - self-locking mechanism
- Elongation: ≤ 7 %
- Ergonomically shaped handles - optimal grip
- Strong and abrasion-resistant polyester webbing

PETEX automatic ratchet straps are ideal for transporting goods in trucks, trailers, vans, and other vehicles. Thanks to their various features, they offer a simple and efficient way to secure the load firmly and safely. The straps feature a convenient automatic retraction mechanism, so you'll never have to laboriously wind the strap back by hand again. With the built-in spring and automatic self-locking mechanism, you can easily control the retraction speed to prevent the end of the strap from snapping back and injuring the operator. The molded handles ensure easy and comfortable handling.

Spring-loaded mechanism: the built-in tension spring automatically retracts the webbing

Gently pull the webbing to unlock it while the belay device is in the self-locking position

SCREEN PRINTING

Print your custom design on our safety products. With our classic screen printing, you can print your own unique design in any size on all PETEX safety products. There are virtually no limits to the colors and designs you can choose. Screen printing is the ideal printing method for customization for orders of 60 or more items.

- Very high print density
- High quality
- Printing available in white or black (other colors available upon request)
- Excellent adhesion to all textiles and common printing substrates

	PROFI	STANDARD	PROFI	PROFI
Administrative and commercial enterprises	1 to 50 employees	1 to 50 employees	51 to 300 employees	According to ÖNORM Z 1020:2025, first-aid kits are not tied to a specific number of people. However, the Labor Inspectorate requires that a "first-aid kit must reach the accident victim within three minutes at the latest." The number of first-aid kits required in a workplace also depends on the potential hazards. If there is a high-risk hazard, the number of kits must be increased in accordance with the risk assessment.

Microfiber Cloths by PETEX
Ideal for Household & Car Care!

Our high-quality microfiber cloths are an indispensable helper in everyday life. They are ideal for cleaning both dry and damp surfaces. They reliably remove dirt and dust and are versatile - for example, for drying, polishing, washing, or rinsing - whether on glass, mirrors, painted surfaces, or chrome. With our microfiber cloths, surfaces can be cleaned and dried easily and gently without being scratched.

AERODYNAMIC FLAT-BAR WIPERS

- Easy installation
- Perfect cleaning thanks to even contact pressure provided by an aerodynamic spoiler
- Quiet wiping thanks to a flexible wiper blade with a durable Teflon coating
- Long service life thanks to a wear-resistant wiper edge made of CR+NR*

* CR = chloroprene rubber, NR = natural rubber

Contents:

- 1 x Installation instructions
- 1 x Wiper blade
- 5 x Multi-adapter

Premium petex Quality

Long Life — Long service life

Quiet

WHEELCOVERS

petex®
Der starke Autoausstatter

In our extensive selection of wheel covers, we offer you two different grades - depending on the design - in sizes ranging from 13“ to 17”.

These wheel covers are made of impact-resistant ABS plastic and, depending on the design, feature chrome-plated elements. Depending on the model, they are painted once or twice.

These OEM-quality wheel covers are made from 100% high-quality nylon. This makes them very durable, impact-resistant, flexible, and weather-resistant. Depending on the design, these wheel covers also feature chrome-plated trim rings, giving your vehicle a sophisticated look. All nylon wheel covers are double-coated.

The following applies to all of our wheel covers:

- Fits almost all steel rims
- The plastic retaining claws do not scratch the rims
- The clamping rings ensure stable, even pressure on all retaining claws
- The brakes remain well ventilated
- Integrated valve recess
- Easy installation without tools

The 2-position adjustable clamping ring allows for easy installation without tools and ensures a secure fit on the rim.

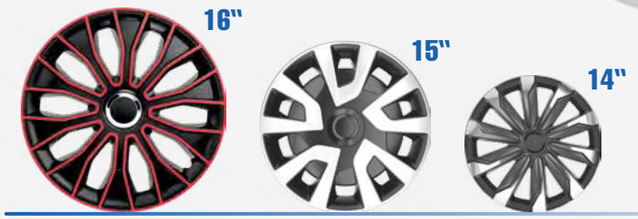

Wheel covers bearing this symbol feature chrome-plated accents.

Wheel covers bearing this symbol feature elements with a carbon-fiber look.

DETERMINING THE CUSTOMS SIZE

Please check the specifications on the tires for which the wheel covers are intended.

ICE SCRAPERS

ICE SCRAPER 4604
WITH SNOW BRUSH AND RUBBER LIP

- Extendable telescoping pole (95 - 150 cm)
- With 2 non-slip soft grips
- Ice scraper made of extremely durable, high-quality ABS plastic
- Broom swivels 90°
- Telescoping pole made of sturdy, anodized aluminum
- Delivered in a box
- Colors: assorted red/blue
- **Ideal for trucks, commercial vehicles, and SUVs**
- **Made in Canada**

Our 4604 ice scraper is made of exceptionally durable ABS plastic and thoroughly clears ice from windows. Use one end to scrape ice off your vehicle's windows while using the other end to sweep snow off the vehicle. The rubber lip on the broom head makes it easy to wipe away water residue. Two non-slip soft grips ensure you always have a firm grip. In no time at all, your vehicle will be ready to go without you getting wet. The telescoping handle extends from 95 cm to 150 cm, and the brush head swivels 90°. With this telescoping ice scraper, hard-to-reach spots on your vehicle are no longer a problem.
